## R.W. Sidley, Inc. Newsletter

### Dried Silica Gravels

You asked, we listened, and now we are proud to announce the addition of Dried Silica Gravels to our product offering!

Our dried gravels are silica quartz, and processed to ensure uniformity in grain size. All dried gravels are washed, dried and screened. All products are tested multiple times a week for quality and consistency. Dried gravel has many applications including industrial, epoxy extender, landscaping and water filtration. R.W. Sidley, Inc. offers a range of dried gravel sizes to suit your project requirements, with many packaging options.

- 3/16 X 3/32
- 1/8 X 1/16
- 1/4 X 1/8
- 3/8 X 3/16
- 1/2 X 1/4

Available packaging: Bulk, 50 lb. bags, 3,000 lb. super sacks and 4,000 lb. super sacks.

Please contact us for samples, product information, pricing and delivery options.

### FEATURED EMPLOYEE

**Dan Sanzobrino, P.E.**

Dan Sanzobrino joined the Sidley Precast Group as their Precast Engineer in the Thompson, OH, office. He is responsible for analysis, design and detailing of the precast components produced. Dan enjoys his job because he has an affinity for prestressed concrete. Also because we don't just design the panels, we make the components and erect them too, which means there are many aspects to the job.

## Wall Blocks

Wall blocks are manufactured and sold at Sidley Builders Centers. They are solid concrete and available in a variety of sizes and surface finishes. The large wall blocks are the perfect solution for large retaining walls or material storage bins. The wall blocks work well in a commercial or residential landscaping setting and may either be left natural or stained depending on the desired look.

Sizes include:

- Stretchers: 6' W X 2' H X 2' D and 3' W X 2' H X 2' D
- Corners: 6' W X 2' H X 2' H and 5' W X 2' D X 2' H
- Top Caps: 6' W X 6" H X 2' D

Decorative surface finishes:

- Landscape
- River Rock
- Multi-stone

All wall blocks are interlocking with a double V-groove design, top caps feature a chamfered edge. Delivery is available with a 35' reach, boom truck. Please call to check availability for quantities and decorative surface finishes.

Dan lived in Madison, OH, close to our precast facility, but has been in Texas for the past 10 years. He graduated from The University of Texas in Arlington with a BS in Civil Engineering. He worked for six (6) years as a Project Engineer for VSL Post-Tensioning in Dallas, TX, and past three (3) years as a Civil/Structural Engineer for Ramboll Oil & Gas in Houston, TX.

Dan is licensed Professional Engineer in Texas, Ohio and Pennsylvania.

Dan moved back to Ohio with his wife Danielle, daughters Fiona and Tegan, and son Brody. When not working Dan enjoys outdoor recreation with his family, playing the guitar and watching football and hockey.

Please join us in welcoming Dan to the Sidley Team!

## Case Western Reserve University

Earlier this month Case Western Reserve University Professor Michael Pollino, Ph.D., S.E., P.E., brought his Civil Engineering students to Sidley Precast for a plant tour of our Thompson, OH facility. Students learned from Larry McCune, Sidley Precast Sales | Quality Control Manager, about the precast manufacturing process starting with bid document specifications, engineering, drafting and production. The students toured our offices, quality control lab and the precast plant. They were able to see all stages of the production process and materials, a highlight of the tour is always our rebar bending machine and many students took home a star souvenir.
