GCBAAs Summer Meeting

In 2018, The Pro/Angle Bunker Sand division of R.W. Sidley joined the **Golf Course Builders of America (GCBAAs)**.

The GCBAAs is the only organization in the world organized by and for golf course builders, and the only organization that represents the interests of the golf course construction industry.

In August, Eric Ludewig attended the GCBAAs

summer meeting in Nashville, TN representing Pro/Angle. The meeting was an outstanding networking and educational event attended by all facets of the golf course construction industry, many of whom we've done business with over the years on renovation and construction projects.

Educational topics included a Facilities Market Watch presented by the **American Society of Golf Course Architects**, and **USGA** Putting Green Construction Guidelines presented by the US Golf Association.

Other sessions at the event included a presentation by Anthony Netto, founder of the **Stand Up and Play Foundation**. The Stand Up and Play Foundation was formed to help wheelchair users and other people with impaired mobility have the opportunity to stand up and participate in sporting, artistic and other daily events.

The summer meeting concluded with a charity auction and golf outing benefiting the GCBA Foundation. The GCBA Foundation has taken special interest in supporting underprivileged children by launching **Sticks for Kids**, a junior golf outreach program for youth aged 5-18. The program provides each Sticks for Kids location with clubs, bags, teaching and marketing materials, and instructors for participating courses.

R.W. Sidley, Inc.
is proud to be
part of the

construction of the new elementary schools for the **Riverside Local School District**. The **Madison Avenue School** and the **Concord Township School** will be identical.

Construction has started on both school and we are delivering block and ready-mix concrete to the sites. Combined the schools utilize approximately 260,160 grey block made up of many size's with the majority being approximately 150,000 8" CMU and about 37,000 12" CMU.
