

R.W. Sidley, Inc. Newsletter

When it comes to building the best cab chassis for municipal snow plow use The Mack Truck Company gets it right. What do municipalities want in their new trucks? POWER, power to plow snow when their dump bodies are full of rock salt which weighs 125 lbs. per cu. ft. Automatic transmissions which when matched to the right rear end ratio provide the correct amount of torque to push a plow when it is down and in use. Wheelbases that are short enough to provide the proper cab to axle for the installation of a 10' or 10-1/2' dump body. What is also very important is providing a clear frame area for the body company to install the dump body without having an exhaust system or frame mounted air tanks in the way for the dump body or hydraulic tanks to be installed. An integral front frame extension of at least 20" is mandatory so as to provide the proper amount of front frame rail for the installation of the type of snow plow hitch that is ultimately chosen. Yes indeed, Mack does a tremendous job in providing a long lasting very durable truck. These are just a few of the many reasons that Mack is now in it's 117th year producing vehicles.

R.W. Sidley, Inc. Golf Outing

On June 15, 2017, R.W. Sidley, Inc. held our company Golf Outing at Painesville Country Club in Painesville, OH. The course was beautiful and weather threaten but held out all day. R.W. Sidley was proud to host our customers and vendors for a day of golf, fun, great food and prizes. Thank you to all who joined us to make this event so successful!

Beach Sand

Chemicals in Ashtabula, OH as their Health & Safety Coordinator. Chris had previously worked for Sidley several years ago in our Safety Department before making the move to ASHTA Chemicals.

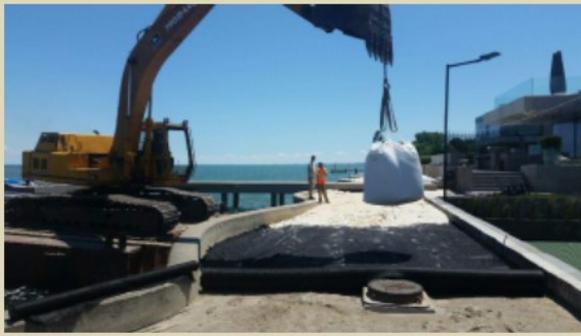

Chris came to work for Sidley's for a new challenge. He is looking forward to working with everyone on strengthening the safety culture, making safety the top priority!

His job duties include ensuring Sidley is in MSHA, OSHA and EPA Compliance.

Chris a native of Ashtabula, OH and currently lives in Geneva with his wife. His interests include fishing, traveling, working outdoors and being on or near the water.

Please join us in welcoming Chris back to the Sidley Team!

Literally the beach! Golf course bunkers are often referred to as being "in the beach", well in this application, our Pro/Angle Bunker Sand is literally being used as the beach! This is a project supplied by Hutcheson Sand & Mixes, our distributor for Pro/Angle in Canada. The beach required 105 super sacks shipped to Windsor, Canada. It is being used as the beach behind a retaining wall on the lake at a private residence. The super sacks of sand were shipped and placed from a barge.
