

Spring production of Pro/Angle is in full gear in Thompson, OH.

## R.W. Sidley, Inc. Newsletter

### Spring Production

One of the sure signs of the arrival of springs here at R.W. Sidley in Thompson, OH, is the start of production at the Pro/Angle plant.

With our climate in Northeast Ohio, our spring start-up is dependent on when winter loosens its grip. This year's mild winter enabled production to begin weeks earlier than usual, and we're busy shipping to golf courses around the country.

Truck being loaded with Pro/Angle.

We're happy to have trucks on the road servicing our customers for their spring maintenance projects needs.

#### FEATURED EMPLOYEE

#### Shaun Kennedy

Shaun Kennedy was recently promoted from a Quality Control Technician to Specialty Plant Supervisor in Thompson, OH. His new responsibilities include the bagging plant operations, he is in charge of scheduling orders for bag material and fulfill those orders as quickly as possible. It is rewarding when a customer asks how soon we can have an order ready and we can tell them they can pick up the next day. There is a lot of communication required with our Quality Control Engineer to ensure the products meet the customers specification to

## Dried Gravel

Our dried gravels are silica quartz, and processed to ensure uniformity in grain size. All dried gravels are washed, dried and screened. Our Quality Control Department conducts routine sieve analysis to ensure our products meet the highest quality and consistency. Dried gravel has many applications including construction, epoxy extenders, industrial, landscaping and water filtration. R.W. Sidley, Inc. now offers a range of dried gravel as well as a wide range of sand sizes to suit your specific requirements, with custom sizing and many packaging options.

• 1/4 X 1/8

• 3/8 X 3/16

• 1/2 X 1/4

production to have the proper material loaded in the bins, to his bagging team and scheduling orders, to our dispatcher who schedules delivery/pick ups with customers.

Shaun likes learning about the plants and how everything works together, and trying to help operators try and solve and prevent problems.

He has a personal goal of trying to produce more bags in the bagging room than the previous day, even though it doesn't always happen, and to find better ways to do things more efficiently.

According to Shaun he thinks this new position involves a lot of strategy which makes it challenging and fun at the same time.

Shaun is getting married to his fiance Morgan in October, and is the proud father of soon to be 2 year daughter, Avery, who he enjoys playing with. He now lives in Painesville and likes making upgrades to his house and wood working when he has time, especially making things for Avery. He still enjoys the outdoors and watching sports, of course.
