

Pro Gold Natural

Pro Gold Natural Bunker Sand

100% Natural Bunker Sand

Pro Gold Natural Bunker Sand is the newest addition to R.W. Sidley, Inc.'s bunker sand product line. We went back to our roots in the golf course industry, offering a quality natural sand that is a great budget-friendly option for many courses. The natural color is often specified by golf course architects who prefer the aesthetics of natural golden brown colored sand found in the region.

Like any ideal bunker sand Pro Gold Natural has been washed and is very clean, containing less than 3% of silt plus clay. Pro Gold Natural contains less than 3% gravel and 7% very coarse sand particles.

Product Information with chemical, physical and sieve analysis, is available upon request.

Revised: 03.29.22

Who We Are

With almost 90 years in business, R.W. Sidley, Inc. operates a state of the art processing plant that produces the highest quality quartz sands of the highest purity free from deleterious materials. Our Thompson, Ohio mine, is part of the Sharon conglomerate formation. We are the manufacturers of Pro/Angle®, the original 100% Angular Bunker Sand.
